5. Mounting and Installation

- 5.1 Handling Precautions
 - (1) Before attempting to install the Unit or carry out the necessary wiring, make certain that the external power supply, used in the system, is shut off on all three phases. Failure to do so may result in electric shock or damage to the product. (2) Do not touch live terminals. There is a danger of electric shock or malfunction.
 - (3) Do not modify the Conversion Adapter or take it apart. Doing so will cause failure, malfunction,
 - personal injury, or fire. (4) Do not touch the energized part of the Conversion Adaptor directly. Contact will cause
 - malfunction or failure in the system.
 - (5) Fasten the Conversion Adapter and the Mounting Bracket securely with retaining screws, and tighten the screws by applying torque within specified limits. Loose screws can lead to the dropping of the Conversion Adapter, or Mounting Bracket, possibly causing breakage thereof. Excessive tightness of the screws can lead to breakage of the screws, Converter Adaptor, Mounting Bracket, or MELSEC-Q Series Module, possibly causing the dropping, shorting, and malfunction thereof.
 - (6) Use care to prevent foreign materials including cuttings and wiring debris from entering the Conversion Adapter or the MELSEC-Q Series Module. These will be cause for fire, failure or malfunction.
 - (7) Do not drop the Conversion Adapter and Mounting Bracket or do not give a strong impact to it. This will cause damage.

5.2 Use Precautions

When mounting one of the following Conversion Adapters on the left side of the Conversion Adapter, leave one slot open between them so that the Conversion Adapter does not interfere with the terminal block of the existing module.
